

# OUR COMMUNITY IS PROTECTED BY NOVAERUS

**Cleaner air helps you stay healthier...  
and because you've entrusted us with your care,  
that's our promise to you.**

We believe in delivering the highest quality of care for residents like you. We take many steps to ensure you are healthy and protected from infections and illnesses caused by airborne viruses, bacteria, allergens and mold.

We have proudly invested in the latest technology from Novaerus to control the spread of airborne pathogens. You'll see this technology throughout our facility and it is all here to provide the highest quality of care.
